# 36" Snap! Crackle! & Pop!

I'm Snap<sup>®</sup>. My younger brothers won't admit it, but I'm the brains of the operation. While they're off laughing and playing around, I'm making sure that new Kellogg's<sup>®</sup> Jumbo Multi-Grain Kriispies<sup>™</sup> are always perfectly delicious. When I do take a break, I like to play games with my brothers.

Hey! Crackle<sup>®</sup> here. My favorite thing to do with new Kellogg's<sup>®</sup> Jumbo Multi-Grain Kriispies<sup>™</sup> is make Rice Kriispies Treats<sup>®</sup> marshmallow squares. Don't you think they're the best? I love to have fun, and my brothers call me a prankster. One time, I made Rice Kriispies Treats<sup>®</sup> marshmallow squares and turned the marshmallows blue. Boy, you should've seen the look on Snap's<sup>®</sup> face when he saw that!

Hi, I'm Pop<sup>®</sup>. Do you like my hat? Crackle<sup>®</sup> says I'm a klutz. One time, I poured myself a big bowl and spilled new Kellogg's<sup>®</sup> Jumbo Multi-Grain Kriispies<sup>™</sup> over everything! But Crackle<sup>®</sup> started laughing and Snap<sup>®</sup> wasn't upset for long. They can't stay mad at me - we're brothers, after all.

## Instructions:

Creating your own height chart is really easy. Just follow these three simple steps.

### Step 1:

Using safety scissors, cut off the white borders on the top and bottom of each printed page.

### Step 2:

Lay the pages on a flat surface and tape them together.

### Step 3:

Find a place to display your height chart. Make sure any adhesive or tape you use won't leave any marks or residue, in case you decide to move the chart later.
